

Training map / schematic

Philomath Wildfire - Training | EX-PHIL-001 (fictional)

Operational period: October 15, 2026 | 0800-2000

Fictional assignment locations and access relationships. No real road, evacuation zone, fire perimeter or facility location is depicted. Not to scale; do not use for navigation.

Field command manages fire suppression outside these County support assignments. Route availability must be confirmed before assessment or delivery; the schematic is not an access authorization.

Map briefing: point out reporting locations, receiving contacts, assessment boundaries and the medical point. A real IAP needs a current, dated map with a legend, scale where applicable, verified locations and authorized access information.

Prepared by: Example Situation Lead | October 14, 2026, 1930. Assignment references: ICS 204s, pages 4-6; medical procedure: ICS 206, page 9.
